What’s in the Box?

In-Home Wireless Medical Alert User Guide

In your package, you will receive the following items:

- Help Button (Standard or Fall Detection)
- Base Unit
- Power Cord

Read thoroughly: contains important information
Getting your medical alert set up is as easy as plug in and go!

1. Plug the Power Cord into a power outlet.

2. Slide battery switch on bottom of Base Unit to “ON” position. Wait about 1 minute for the Base Unit to establish a connection.

3. Press your Help Button. You will hear a series of beeps from your Base Unit.

4. When you hear the operator, please indicate that you are testing your medical alert for the first time.

You’re all set!
How Do I Test & Use?

We recommend testing your system once a month. Remember, you have unlimited button presses. Place your Base Unit in the room in which you spend the most time.

Press the alert button on your pendant or Base Unit

Connect to the Command Center

The Command Center will send help unless you inform them that you’re testing

Please Note: If you press your button but are unable to communicate through the base unit, we will send help.

How Do I Wear My Alert?

FAQs

Q: What is the range of my Wireless Medical Alert?
A: The range is up to 600 ft around the Base Unit.

Q: How long does the back-up battery last?
A: In the event of a power outage, the back-up battery lasts up to 24 hours.

Q: How heavy is the button?
A: It weighs 0.4 oz.

Q: How loud is the In-Home Medical Alert System?
A: It is 60 dB. This is comparable to a cell phone on speaker at maximum volume.
**Battery** is designed to hold a charge for 24 hours but may be reduced as a result of user activity, talk time, device-specific settings, and device life.
